

“YOU SUPPLY THE TALENT... WE’LL SUPPLY THE REST!”  
**THE COMPLEAT SCULPTOR**

Minwax® Wood Putty® is a non-hardening, pre-mixed putty that fills small holes and covers other minor imperfections in bare, painted, stained, and finished wood. Minwax® Wood Putty® is color-matched to Minwax® Wood Finish™ stains.

- *Application tool:* putty knife
- Surface Preparation: no sanding necessary
- Cleanup: soap and water
- Recommended uses: bare, stained or finished woodwork, paneling, molding, trim and doors.
  
- *Q: How is Minwax Wood Putty® different from Minwax® High Performance Wood Filler?*

Unlike Minwax® High Performance Wood Filler, Minwax Wood Putty® is a non-hardening putty designed to cosmetically fill nail

holes, joints and other minor surface imperfections. Additionally, Minwax Wood Putty® is color-matched to the Minwax® Wood Finish™ stain line. Minwax® High Performance Wood Filler is a heavy-duty filler that repairs damaged or rotted wood.

- *Q: How is Minwax Wood Putty® different from Minwax® Stainable Wood Filler?*

Minwax Wood Putty® is designed to fill minor surface imperfections in finished wood. It comes in ten colors to match Minwax® Wood Finish™ stains and does not harden. Minwax® Stainable Wood Filler is designed to fill nail holes, cracks, gouges and other defects in unfinished wood. It does not come pre-colored. It readily accepts and Minwax® stain and, once stained, will match the surrounding wood. Minwax® Stainable Wood Filler harden and is strong enough to hold nails and screws.

1. Surface must be clean and dry.
2. Press putty into nail holes or minor imperfections. Colors may be blended for custom matches.
3. Wipe excess putty from surrounding area with damp cloth. Will not harden to a sandable surface.

*Note:* Stain, seal or topcoat before applying putty

*Cleanup:* soap and water
